Creative Web/Mobile Developer offering 3+ years of experience providing high- impact web solutions for diverse industry organizations. Skilled in designing, developing, and testing multiple web-based applications incorporating a range of technologies. Aspiring to combine broad background with strong technical skills to excel as a Fullstack web engineer.

Relevant Experience

Sr. Software Engineer @ Chetu India Inc.

Aug 2021 - Present // Noida, India

- ▶ Worked within a team with highly experienced engineers where I contribute my knowledge and skills to develop a full stack web application based on Micro-frontend and Micro- services.
- ▶ My responsibility is to write highly abstracted and reusable web components which must be readable and meaningful for other engineers.
- ▶ Integrated several design patterns in the projects to keep the architecture and data flow can as much as possible. (ex:- iterator, factory, builder, observer, command, etc.) Developed and design a web application based on React with typescript, and Redux for a centralized state.
- ▶ Focused on Object Oriented Designs and Principles and developed a framework that works as an interceptor between APIs and react app mainly used to serialize and deserialize complex data structures before the react application received the response or vice-versa

Software Engineer @Praxiv IT Solution

Jan 2020 - Aug 2021 // Gurugram, India

- ▶ Manage website development projects from initial design through completion, optimizing all cross-browser and multi-platform compatibility.
- ▶ Work closely with programmers and clients to meet project requirements, goals, and desired functionality. Developed Angular web application from scratch to operate the admin functionality of iOS and Android applications (whats42nite.com) Integrated charts, graphs, and data tables to present the reports on a weekly, monthly, and yearly basis.
- ▶ Developed 42nite web browser purchase Angular app which increase the sales of event tickets to 80%, Integrated stripe payment gateway to generate orders and jsPDF to generate ticket copy as a PDF file (tech-stack used - Angular, RxJS, PHP Yii, typescript).
